# Wire Frame Documentation

Consignment Pricing Prediction

Homepage

First thing anyone will see is a pop-up window on Homepage which will ask for User Inputs like Country, Shipment mode, item description, Brand, Unit Measure, line-item quantity, manufacturing site, first line designation, weight in kg, Insurance amount.

Based on User's input, our model will predict the consignment price and the result will be displayed on another page.

The {{cost}} will be replaced by the predicted value. The Go Back switch will direct the user back to input page.
